

Holzmedia
Elements

Media furniture for the individual integration of
displays and media technology
Simple. Sophisticated.
Impressive.

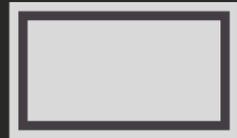

Holzmedia

The idea

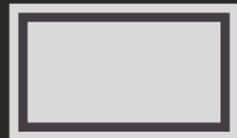

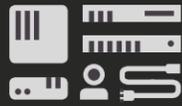

Basic media furniture for free technology integration.
High-grade and representative. Easy to use.
Thoroughly thought-out to the last detail.

Holzmedia Elements
Simply order.

Display and media technology
Simply install.

Integrated media furniture
Simply impressive.

Simply order.

Holzmedia Elements offer high-quality **solutions for displays of nearly all sizes, weights and configurations.**

No need for custom development and construction.

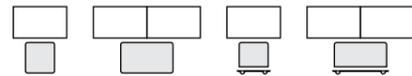

Displays and technology components can be directly integrated – even on the customer's premises.

Uncomplicated ordering is part of our concept:

- First you choose the model that best meets your needs (see below).
- Your choice of display type, display size and furniture body will help you find the exact model that best meets the needs of your project.

Display columns / Media columns

wall-mounted or mobile, for 1-2 displays from 55" to 98"

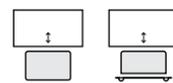

Media walls

wall-mounted, for 1-2 displays from 65" to 98"

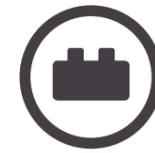

Height-adjustable media furniture

especially for interactive collaboration
wall-mounted or mobile, for displays from 55" to 98"

Simply install.

Simple things are the hardest to do well.

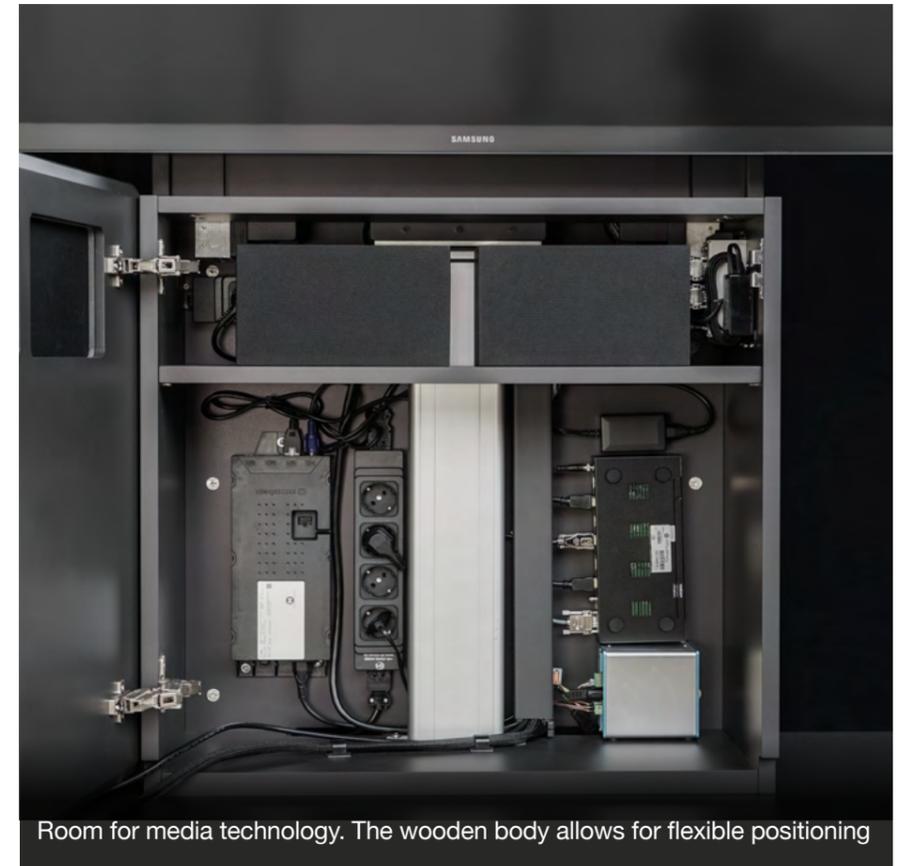

We concentrated all our experience to make Holzmedia Elements perfectly thought-out. They offer

- maximum room inside, easily accessible for effortless technology integration
- completely hidden cable guides with practically positioned cable openings

- passive air-vents in the technology housing for components that generate heat
- Media columns and Media walls prepared for the installation of videoconference systems
- easy attachment of displays and technology components to the body
- good access for technology maintenance

Elements body (Media column)

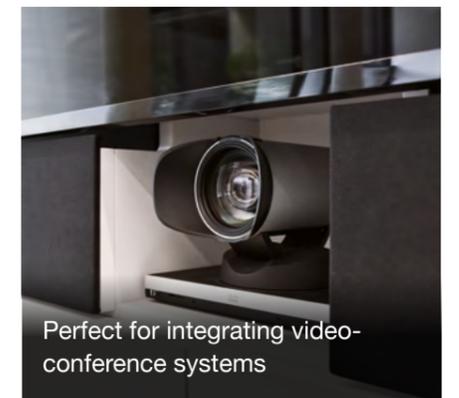

Room for media technology. The wooden body allows for flexible positioning

Wood surface for display mounting, mount can be freely positioned

Passive ventilation inside body

Perfect for integrating video-conference systems

Simply impressive.

A worthwhile alternative

Holzmedia Elements with its representative media furniture offers a high-end and sustainable alternative to regular off-the-rack solutions.

The sophisticated concept is the basis for perfect customer solutions – without the high cost of custom development or construction work.

The right choice for demanding customers, who expect elegant design and prestige for their rooms in addition to perfect functionality.

Developed with a love for detail and crafted to the highest standards. Unmistakably Holzmedia – MADE IN GERMANY.

We have more than one century experience in crafting furniture in the Holz family and more than one decade experience in integrating media technology.

Holzmedia comes from the traditional Holz carpentry, where fine furniture was crafted long before the concept of the modern office even existed.

Focusing on the needs and expectations of our clients – as well as on innovation and specialization – we offer the perfect combination of furniture and media technology.

Thus, we make the conference rooms of our customers stand for efficiency and good results. While being impressive calling cards.

This is documented by large, challenging custom projects. And by thoroughly thought-out furniture concepts, which simplify the workflow of our partners and customers.
