„Another Dimension"

The body of the ELEMENT ONE table connection panel is made of aluminum and stainless steel. For the visible surface, almost any desired coating can be optionally selected to ensure an individual room design. Various metals are possible as well as wood, linoleum or resopal. And the cherry on the cake is the optionally integrated LED lighting.

A special detail is the innovative closure by means of a neodymium magnet. The challenge in the development of the SOCKET-X was to integrate an invisible mechanism for the closure flap into the smallest possible housing. With a width of only 100mm visible surface and an installation depth of max. 32mm, the table connection panel is extremely compact and reduced to the minimum.

The length of the SOCKET-X is selectable. 140, 170, 200, 230 and 260mm are available in standard, customized dimensions on request. SOCKET-X can be individually configured and equipped with modular plug-in elements for power, USB, HDMI, XLR, RJ45, charger, cable retractor etc., depending on the requirements. SOCKET-X can also be ordered as a combined „SILVERLINE" unit with the FOLD! or CONVERS monitor.

Minimalist design - maximum functionality

A table connection panel is a natural part of modern meeting room design. But how big does it have to be, the developers at ELEMENT ONE asked themselves, and the result was SOCKET-X. Small, high-quality, with a unique magnetic closure and various surfaces. The SOCKET-X complements the ELEMENT ONE range with a sophisticated table connection panel in the renowned ELEMENT ONE quality. The special feature: SOCKET-X is perfectly adapted to the integratable flat screens in terms of dimensions and appearance.
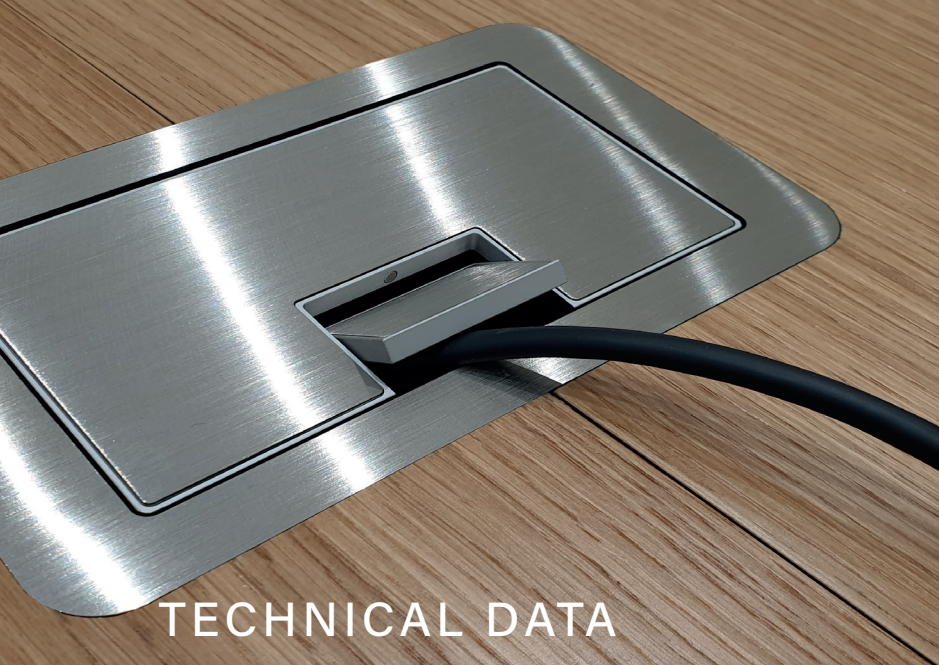

SOCKET-X 140 | 170 | 200 | 230 | 260

- Available in 5 different sizes
- Width of SOCKET-X = width of ELEMENT ONE CONVERS & FOLD!: 100mm
- Also available as integrated, seamless CONVERS-SOCKET-X unit: SILVERLINE
- Modular connection and control elements
- Closing flap made of aluminum and stainless steel
- Innovative magnetic closure for opening/ closing the flap and easy wiring
- Aluminum housing
- LED illumination (optional).
- Low profile design
- Compact housing dimensions
- Maintenance free
- 5 year limited warranty

# SOCKET-X   140 | 170 | 200 | 230 | 260

Product Specification

ELEMENT ONE

| Art. No.	SX-TAF-140 D	SX-TAF-170 D	SX-TAF-200 D	SX-TAF-230 D	SX-TAF-260 D
Type	SOCKET-X 140 Design	SOCKET-X 170 Design	SOCKET-X 200 Design	SOCKET-X 230 Design	SOCKET-X 260 Design
Function	Desktop connector panel in compact design. The SOCKET-X 140 has a grid of 3 fields, which can be modularly equipped with connection sockets for power (AC), audio, video, data and buttons. Convenient to use magnetic closure mechanism, which also serves as a cable feed-through. Installation width 100mm, therefore form-fitting combination with CONVERS and FOLD! Integrated mounting mechanism for tool-free installation.	Desktop connector panel in compact design. The SOCKET-X 170 has a grid of 4 fields, which can be modularly equipped with connection sockets for power (AC), audio, video, data and buttons. Convenient to use magnetic closure mechanism, which also serves as a cable feed-through. Installation width 100mm, therefore form-fitting combination with CONVERS and FOLD! Integrated mounting mechanism for tool-free installation.	Desktop connector panel in compact design. The SOCKET-X 200 has a grid of 5 fields, which can be modularly equipped with connection sockets for power (AC), audio, video, data and buttons. Convenient to use magnetic closure mechanism, which also serves as a cable feed-through. Installation width 100mm, therefore form-fitting combination with CONVERS and FOLD! Integrated mounting mechanism for tool-free installation.	Desktop connector panel in compact design. The SOCKET-X 230 has a grid of 6 fields, which can be modularly equipped with connection sockets for power (AC), audio, video, data and buttons. Convenient to use magnetic closure mechanism, which also serves as a cable feed-through. Installation width 100mm, therefore form-fitting combination with CONVERS and FOLD! Integrated mounting mechanism for tool-free installation.	Desktop connector panel in compact design. The SOCKET-X 260 has a grid of 7 fields, which can be modularly equipped with connection sockets for power (AC), audio, video, data and buttons. Convenient to use magnetic closure mechanism, which also serves as a cable feed-through. Installation width 100mm, therefore form-fitting combination with CONVERS and FOLD! Integrated mounting mechanism for tool-free installation.
